A Touchstone Energy® Cooperative

Take control of your power bill

EXCITING NEWS! Last month, I hinted that we would be unveiling an opportunity for you to directly control your

bill by keeping an eye on peak power use. For years, whenever members would ask us how to lower their power bills, we only had one answer—use less. I am delighted to tell you that there is a much better opportunity coming this summer for you to take control of your power bill!

We have been working with a rate consultant for the past several months and have determined that we can accomplish this with a new rate structure. First and foremost, this is not a rate increase. Your cooperative is a not-for-profit organization, and we have designed this rate structure to allow us to continue to provide reliable, low-cost power to you.

This restructured rate will have three parts. Two of these three parts have always been in your bill. Your account charge will remain the same, and your energy charge is being reduced from 12.5 cents per kilowatt hour to 6.5 cents. The new part, a peak charge, is only applied to use during the following peak hours.

- ▶ **Winter peak hours—Nov. 1 to March 31, from 6 a.m. to 9 a.m.**
- ▶ **Summer peak hours—April 1 to Oct. 31, from 4 p.m. to 7 p.m.**

What this means is that you have the opportunity to avoid most or all of this new charge if you are careful WHEN you use certain things in your home or business. The price SEC pays for the electricity we distribute to you varies significantly throughout the day and the year, which impacts the costs passed on to you. Some of you have already been adjusting your use to avoid the peak for years, and we thank you for that since your efforts have helped your cooperative. Going forward, your efforts will result in direct savings to you.

I am particularly pleased with the fact that we were able to structure the new rate so that you can use all the power you want for 21 hours of every day at a significantly reduced rate (almost cut in half!). There are only three hours of each day that you need to keep an eye on. We have dedicated numerous recent columns in this magazine to outlining how you save during these peak hours, and you can always find this information on **santee.org**, or scan the QR code below.

Technology has limited our ability to implement this new rate structure until recently. Now that we can measure and store hourly data from all of our meters, we can make sure that what we charge all of our members more appropriately lines up with their actual cost of service.

This new rate structure will be effective for bills generated on or after August 1 (July and later use). The next page explains this in more detail. Also, you should receive a letter from us this month explaining how this impacts your account(s) specifically. As always, if you have any questions, just give us a call.

ROBERT G. ARDIS III
 President and Chief Executive Officer

Our rate has a new look!

OUR NEW RATE STRUCTURE gives members more control over their power bill than ever before! By simply reducing energy use during the “peak” hours, members can save on power bills.

The new rate structure

Account Charge The basic facilities charge will now be called the Account Charge and is 84 cents per day for traditional accounts. This is the per day operating cost to get power to you and is based on how many days are in the billing cycle.

LOWER Energy Charge The Energy Charge is now much lower. The current base energy charge is 12.5 cents for each kilowatt hour used (kWh). The new charge is 6.5 cents per kilowatt hour.

NEW Peak Charge This charge is based on your highest ONE hour of electricity use in the billing cycle during the peak hours. The charge is \$12 per kilowatt (kW) in that one highest hour. This is your opportunity to save. By reducing energy use during peak hours, you can reduce your peak charge.

What are peak hours?

Peak hours are the times during the day when electricity is most used and most expensive. Santee Electric is a distribution cooperative. We purchase power from our supplier and just like our members, we also pay for the ONE highest hour of energy use in the billing cycle during the peak hours. When you save energy during the peak hours, we save as well, and the savings are passed along.

Winter peak hours are Nov. 1 to March 31, 6 a.m. to 9 a.m.
Summer peak hours are April 1 to Oct. 31, 4 p.m. to 7 p.m.

A Sample Bill Comparison

Helpful Tools

- ▶ Monitor your energy usage on SEC’s SmartHub app! Check out page 12A to learn how!
- ▶ Visit energysmartsc.org to learn about all of the energy efficient products available.
- ▶ Visit our website santee.org for more information and energy saving tips.

You don’t have to turn everything off during the peak hours.

You can simply avoid using all appliances at the same time. For example, if you are cooking, drying clothes and the air conditioning is running, your peak use will be higher. Consider running the dryer after the cooking is done or even better, after the peak hours.

How to cut energy use during peak hours

What can you do to cut down on energy use during the peak hours? Here are some tips.

- ▶ Manually adjust or program your thermostat so that your HVAC runs less during the peak hours.
- ▶ Limit hot water use during the peak hours. Consider placing a timer switch on your water heater that helps shift your energy usage.
- ▶ Use your dryer, oven, or other high use appliances before or after the peak hour.

Our new rate structure will go into effect for July energy use (your August bill).

SANTEE EXTRA

Capital Credits list, Annual Meeting details

SANTEE ELECTRIC Cooperative has unclaimed capital credits for former members whose last known address is in South Carolina. Check our unclaimed capital credits list on pages 12C-H to see if the cooperative owes you money.

SEC’s 2023 Annual Meeting of Members will be held on Tuesday, April 18. See pg. 12B for the official meeting notice and details on our drive-thru registration event.

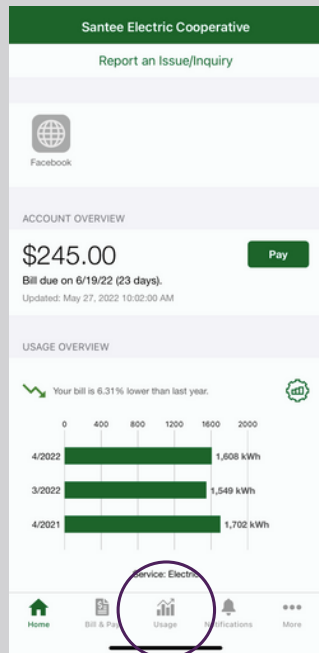

How To:

MONITOR POWER USAGE ON THE SMARTHUB APP

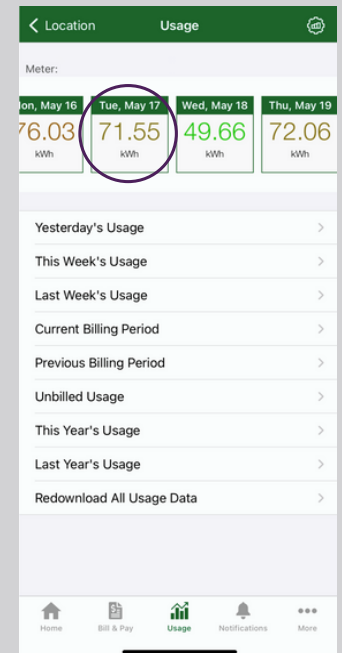

STEP 1

When you open the SmartHub app to the home page, it shows your usage for the last billing cycle. To view your daily usage, click on the Usage tab that is located at the bottom of the page in the middle.

STEP 2

On the Usage page, it shows your daily energy usage which is measured in kilowatt hours. You can then see your usage broken down into hourly usage by clicking on one of the days at the top.

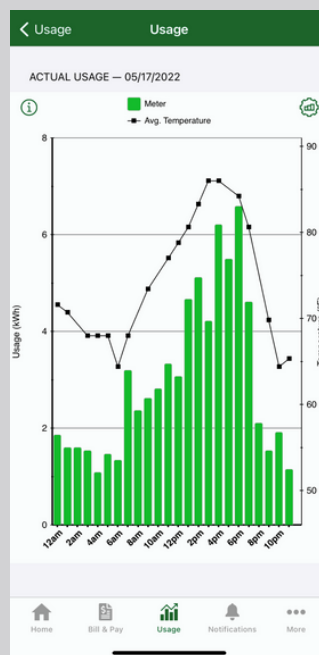

STEP 3

This page shows the hourly breakdown of your power usage.

Green= the power your meter is using

Black Line= the average temperature outside

Usually extreme temperatures cause a rise in energy usage so seeing what the temperature was outside can help explain your usage.

By viewing the hourly breakdown you can determine when you use the most power and when you have the most opportunity to save.
